

FOR IMMEDIATE RELEASE**NATIONWIDE ENVIRONMENTAL SOLUTIONS INTRODUCES
NEW EAST COAST REPRESENTATIVE FOR
ENVIRONMENTAL PRODUCT LINE**

Kingwood, TX, June 2, 2010..... Nationwide Environmental Solutions and Combustion Designs, Inc. (CDI) have signed a new representative agreement involving the sale of Nationwide's low NOx CataStak Selective Catalytic Reduction (SCR) system, EconoStak economizers and other related environmental control technology products. This agreement enhances Nationwide's presence in the East Coast market, where emission requirements are tightening.

Robert Remkes, Vice President of Nationwide Environmental Solutions states, "With almost forty years industrial and utility boiler experience and customer support, Combustion Designs has the expertise and commitment to provide superior solutions to users facing strict NOx reductions. This new relationship further strengthens both companies' ability to focus on market areas where our products can help solve environmental compliance issues and improves efficiency, thus lowering the carbon footprint of many facilities."

Nationwide Environmental Solutions, a strategic business unit of Nationwide Boiler Inc., offers a complete line of environmental and energy efficiency solutions for boilers, heaters, turbines, and furnaces, featuring the CataStak™ SCR system. Visit Nationwide Environmental
